Jovan Vujasinović

CEO
Meter&Control doo
http://www.meterandcontrol.com
Description
Meter&Control provides hardware and software solutions for AMM smart energy metering and management in industrial and residential environments. As an independent company, we successfully implement innovative thinking, latest technologies, engineering expertise, continuous development, and quality excellence in all our products, from concept to manufacturing. These features are combined with unsurpassed functio-nalities, reliability associated with genuine European manufacturing, ease of use, attractive design and competitive pricing, which keep us above the competitive edge in the industry. With a proven and successful track record in the sector, Meter&Control has earned the highest industry standards and certificates, thus joining the exclusive company of few global leaders in the field of energy metering and control. As a reliable and flexible partner, we have already won important international references on global market and are constantly pursuing the development of new solutions in the dynamically evolving market of smart metering.
