Bilateral Meetings

- Wednesday 17th October 13:00 - 17:00

Description

The company PPT-Petoletka DOO develops, produces, sells and provides services of servicing hydraulic, pneumatic and electrical devices and systems for installation in commercial vehicles and vehicles of agricultural and construction machinery, process industry and other fields of application. Our production program contains 1. Hydraulic cylinders from the smallest diameters up to high diameters of 500mm ad length of 10m. 2. Hydraulic components for hydraulic systems used in agriculture, construction machinery's, machines, power units, truck, buses. This includes products like gear pumps (like Bosch), axial piston pumps (like Linde), radial piston pumps, hydraulic motors (gear and piston), directional control valves, power units. In one sentence, we are covering wide range of the items used in various hydraulic installations. 3. Hydraulic steering units. Servo steering Pumps (orbitrols - for use in tractors and slow moving : construction machinery's, forklifts,). Also, steering systems for trucks and buses (old type like ZF) 4. Pneumatic components and installations for industrial pneumatic installation (pneumatic cylinders, pneumatic directional control valves, air preparation units, compressors) 5. Pneumatic brake devices (like Knorr, Wabco, Haldex) for application in tractors, trucks, buses and railways.
